

RUBRIC #3, PART 4

FORMATIVE

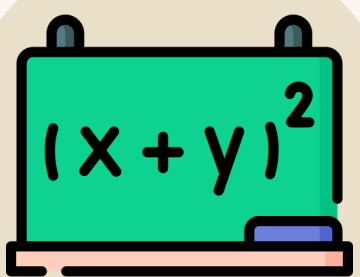

MARKUPS/DOWNS, ALGEBRAIC COMBINATIONS, & PROFIT RATIOS

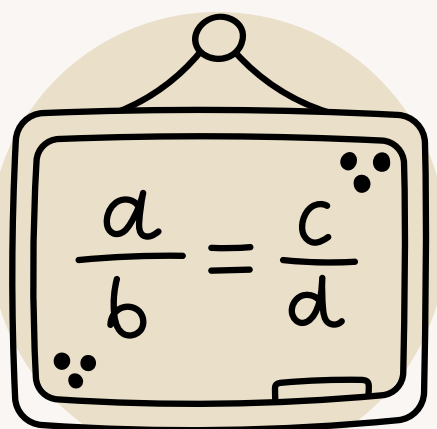

MARKUPS/DOWN

Accurately calculates all markups/markdowns and clearly distinguishes between increasing and decreasing prices. Uses the area model accurately and connects the representation to the percentage calculation. Accurately applies 6.87% tax and explains how tax affects the final price.

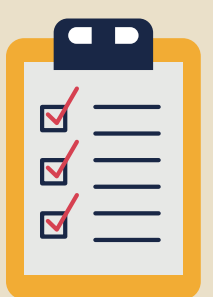

ALGEBRAIC COMBINATIONS

Correctly substitutes values, follows the order of operations, and explains the meaning of each factor.

PROFIT RATIOS

Accurately identifies cost, selling price, and profit and simplifies the profit-to-cost ratio.

POINTS (30 TOTAL)

Markups/Down	/10
algebraic Combinations	/10
Profit Ratios	/10

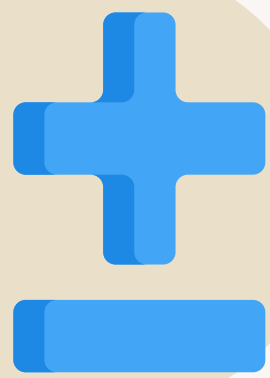

Please use the feedback given from your formative assessment to make corrections and submit a final version for your summative.
